

M SIDE GRILLES

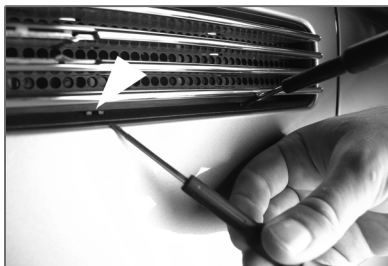

INSTALLATION INSTRUCTIONS

Prior to installation:

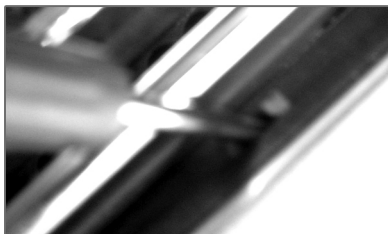

Your replacement grilles do not come with M-logos. Carefully peel the logos from your existing side grilles and use the provided double sided fabric tape to apply them onto your replacement grilles.

TOOLS NEEDED FOR INSTALLATION: 2 small Flathead screwdrivers.

- 1) Start by getting two small Flathead screwdrivers and placing them into the notches on the lower part of the grille. Pulling up on these notches releases the grilles from their bottom seating position..

* The screwdriver should sit like this in the notches as you are putting upward pressure onto them..

- 2) Once you have lifted the bottom out while lifting the clips remove the grille.

- 3) Insert your replacement grille by placing the top in first and then snapping the bottom into place. Make sure the grille is properly centered.
